## Q1. How to connect the watch with your phone?

1. Download the [FitCloudPro](#) app from App Store or Google Play, or by scanning the QR Code below:

2. Turn on the app [FitcloudPro](#), click Device - Bind Device - Search Now to find the watch (P95) in the search list and click P95 to to complete the pairing, finally allow Bluetooth Pairing Request.

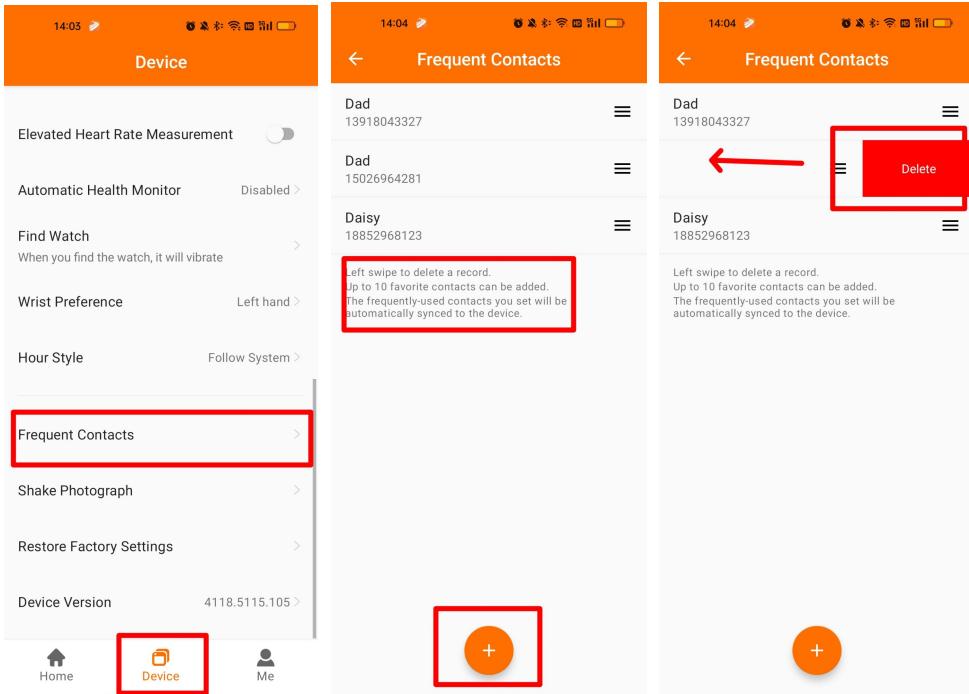

### Note:

1. Make sure there is no obstructions between the device and the phone, such as metal jewelry.
2. Connecting too many devices with Bluetooth can also affect connection stability. Please ignore some devices.
3. Allow FitCloudPro app to run in the background.
4. Keep the distance between the watch and cell phone within 5 meters.

## Q2. How to use Bluetooth calling function?

Keep the watch connected with app and Bluetooth.

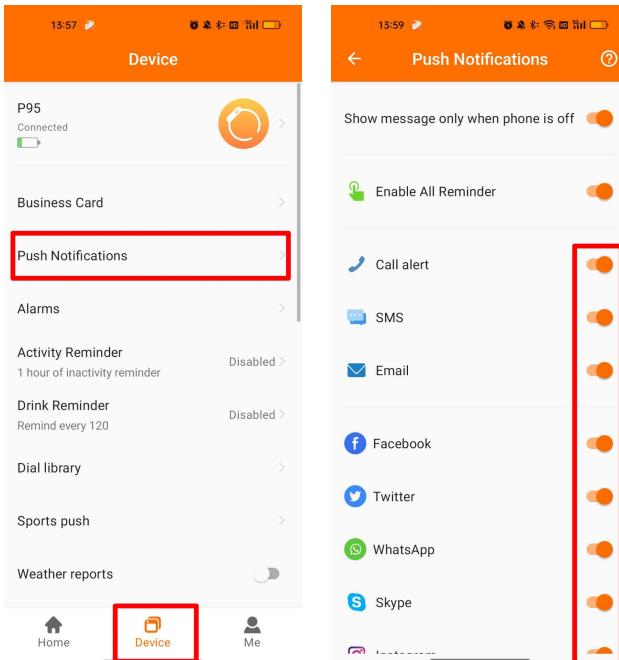

1. Click Device - Frequent contacts - '+' to sync contacts in the app. Swipe the selected contact to the left to delete it.

2. Press the side button to enter the menu, click Dial, choose from Contact person or Call records to make calls on the watch.

## Q3. How to receive messages on the watch?

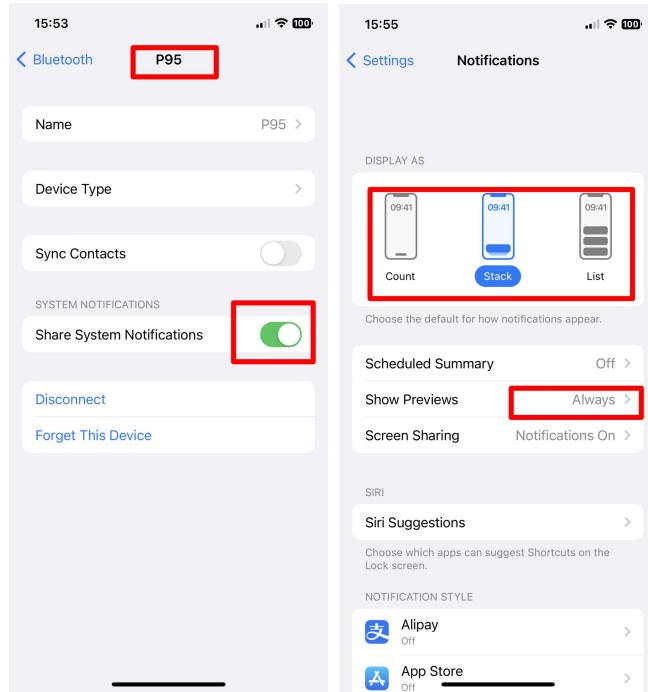

1. If you have allowed all permissions when installing the app, please open the app FitCloudPro - Device - Push Notifications - Turn on the app you want to receive notifications.

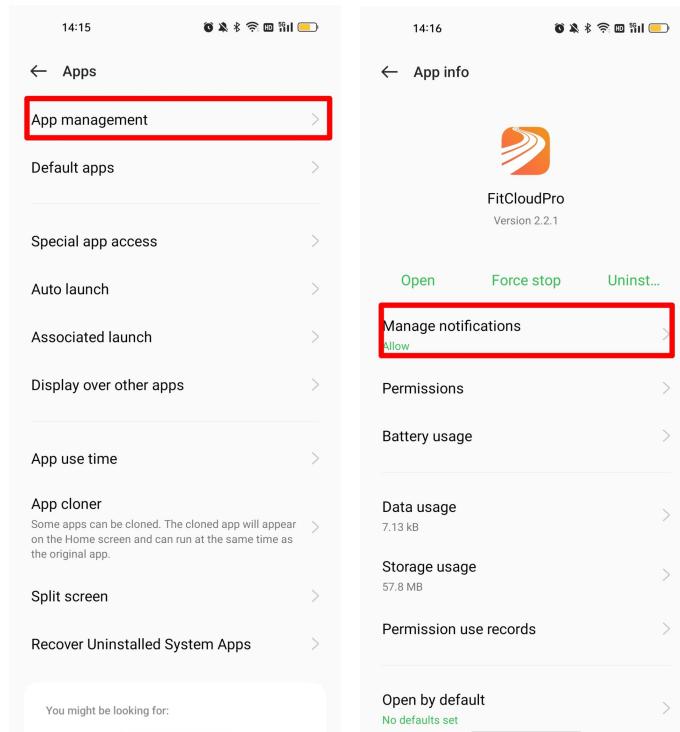

2. If you did not allow all usage permissions when installing the app, there are 2 settings that you can receive the messages:

1) Please reinstall the app, and allow all usage permissions, click [Device - App Reminder - Turn on the app you want](#) to receive notifications, and you will receive message notifications.

2) For iPhone users, you need to turn on [Share System Notifications](#) in the Bluetooth firstly, and follow the below steps, then repeat the above steps.

For Android phone users, you need to [allow notifications of the app](#) firstly, and follow the below steps, then repeat the above steps.

**Note:**

- a.The watch needs to be connected to the app and Bluetooth of your mobile phone.
- b.The watch only receives message displayed in the mobile phone message notification bar.
- c.Keep the watch and mobile phone within 5meters.
- d.Different phone models may have different settings.

#### **Q4. How to get accurate measurements of heart rate, blood pressure and blood oxygen?**

1. Fill in the gender, age, height and weight information in the app.
2. Wear the watch two fingers away from the wrist bone. Incorrect wearing posture will affect the measurements.
3. Lay the arm flat, relax, keep still and make sure the watch is close to the skin.

**Note:**

Even when worn correctly, individual differences such as skin tone, hair, tattoos and scars can affect the readings.

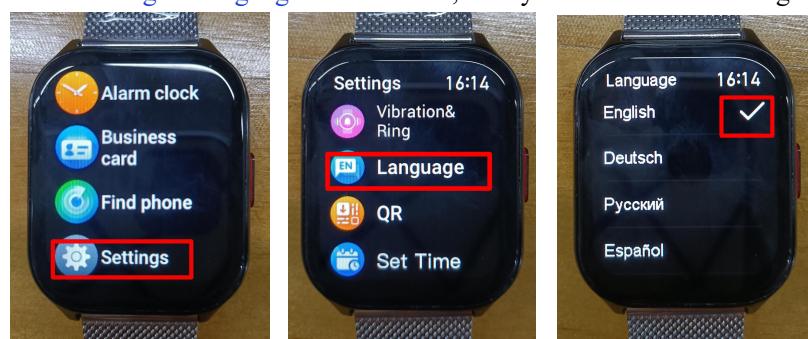

The data cannot be intended for medical use, all measurements are for general fitness purposes.

#### **Q5. How to get the accurate sleep data?**

1. Please wear the watch on your non-dominant hand while you sleep. (For example, if you are right-handed, please wear the watch on your left hand.)
2. The sleep function only records sleep data at night.
3. When wearing the device, make sure that the front of the device is facing up. Wear it on the back of the wrist bone while making sure the watch is close to the skin. Avoid wearing it too loose or too tight, which may cause sleep data inaccurate.

#### **Q6. How to switch the watch language?**

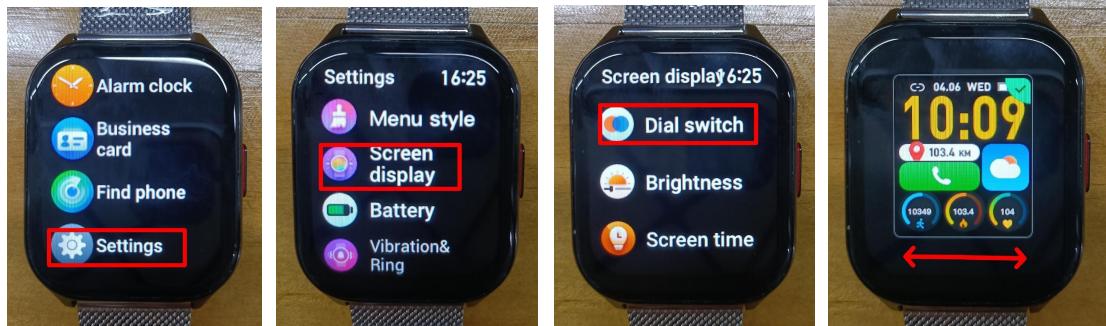

Click [Settings - Language](#) on the watch, then you can choose the language.

## Q7. How to switch the watch face?

### Set on the watch:

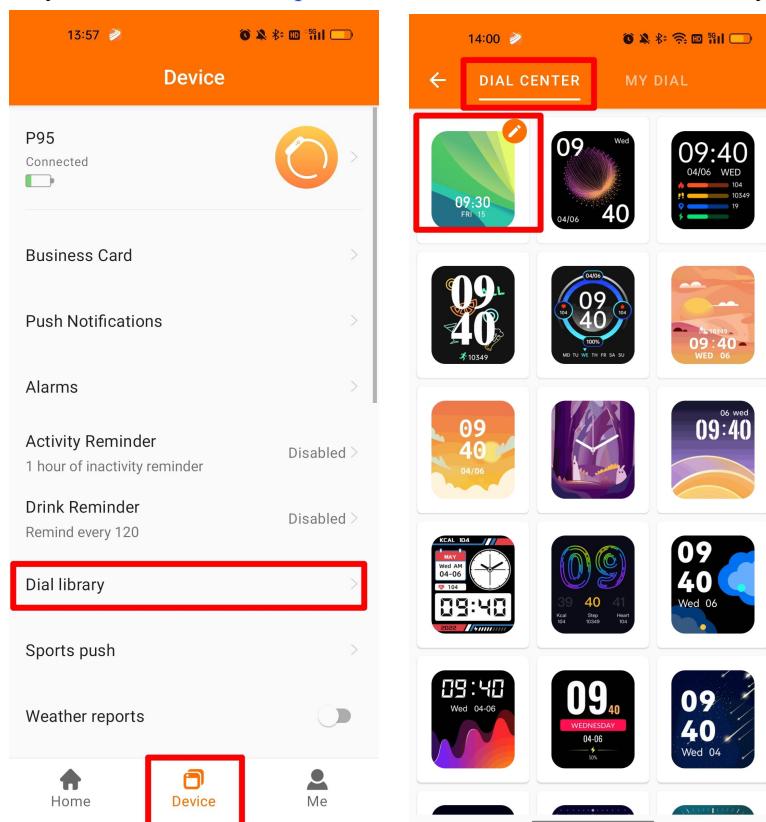

- 1) Long press the watch's home screen, swipe right/left to choose the watch face you like.
- 2) Click Settings - Screen display - Dial switch, then choose the watch face you like.

### Set in the app:

Under connection, turn on the FitCloudPro app, click [Dial library - DIAL CENTER](#) to choose the watch faces you like.

Or you can click [the first picture in the DIAL CENTER](#) to custom your watch face.

## Q8: How to use split screen?

Swipe right on the watch's home screen, the split screen will appear and you can see your frequently used functions. You can click the function icon to enter directly.

## Q9. How to set the watch time?

1. After connecting, the watch will automatically sync the time with your phone.
2. You can also set the time on the watch. Click [Settings - Set Time](#), then you can set time and date.

**Note:** The original data of the watch will be reset if the time and date are set differently.

## Q10: How to adjust the brightness and set the screen-on time?

Click [Settings - Screen Display - Brightness / Screen time](#), then you can set them.

Regarding brightness, you can also directly swipe down the main screen and click on brightness adjustment icon.

## Q11: How to set the vibration mode and intensity of reminders?

Click [Settings - Vibration&Ring - Mode / Vibration](#), then you can choose the mode and intensity.

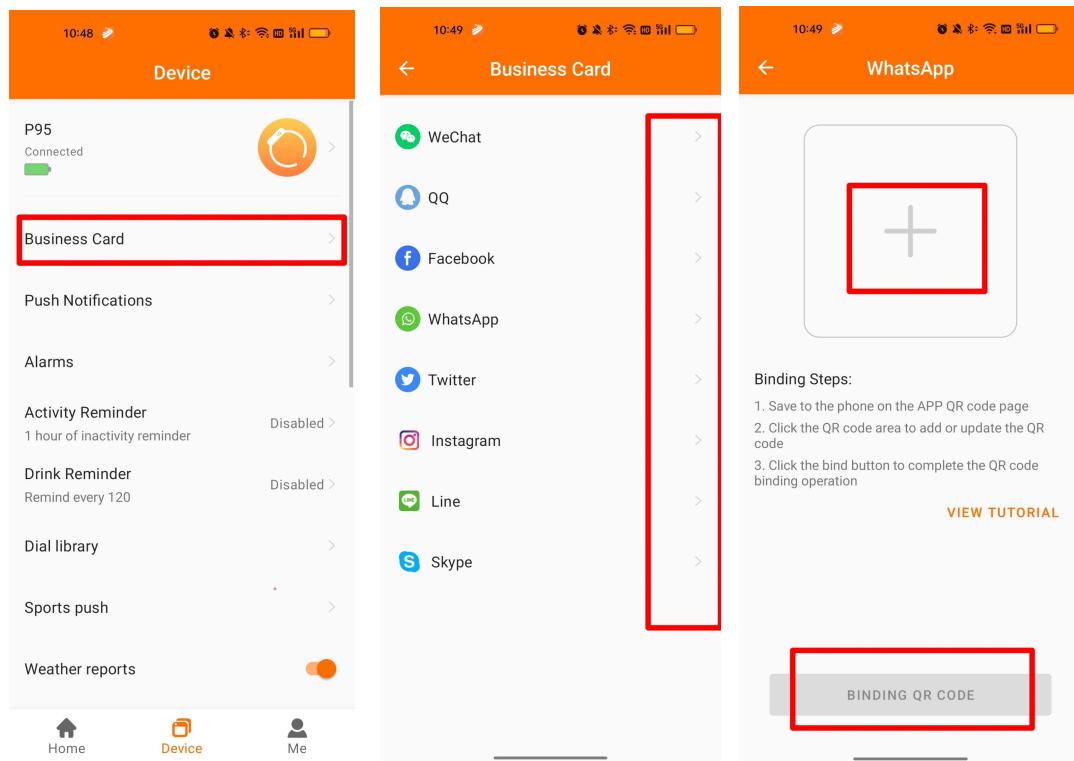

## Q12: How to add a feature shortcut page?

Swipe left on the watch home screen to '+' icon, click it and choose the feature to add to shortcut page.

## Q13: How to add the Business card?

1. Save the QR code of your social media app to your phone album.
2. Click [Device - Business Card - Select the app you want - click '+' icon - BINDING QR CODE](#).

## Q14: How to change the theme of the function list?

Click [Settings - Menu Style](#), then you can choose from 5 styles: Honeycomb, Half Moon, Sudoku, List, Circle.

## Q15: Why does the watch no respond, after charging for a period of time?

When the device is not used for a long time, it will enter the low power state. Please use the mobile phone charger to charge for about half an hour to activate it.

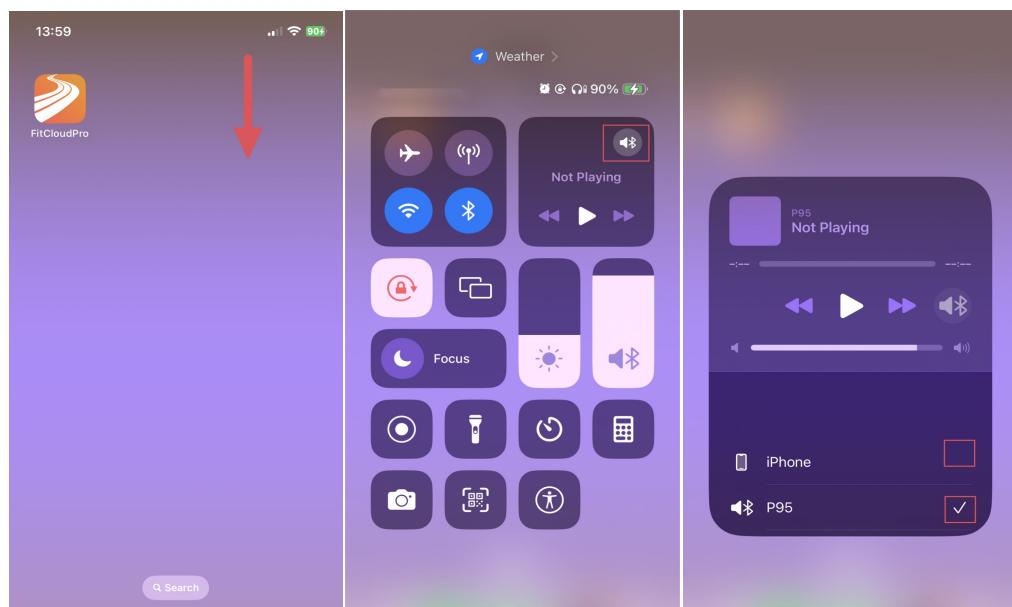

**Note:** When charging, it is best to connect the charging head of the mobile phone. The current on the computer is too small, and it may be difficult to charge when the power is low.

## Q16: How to switch speakers between the watch and the phone?

1. For iPhone user:

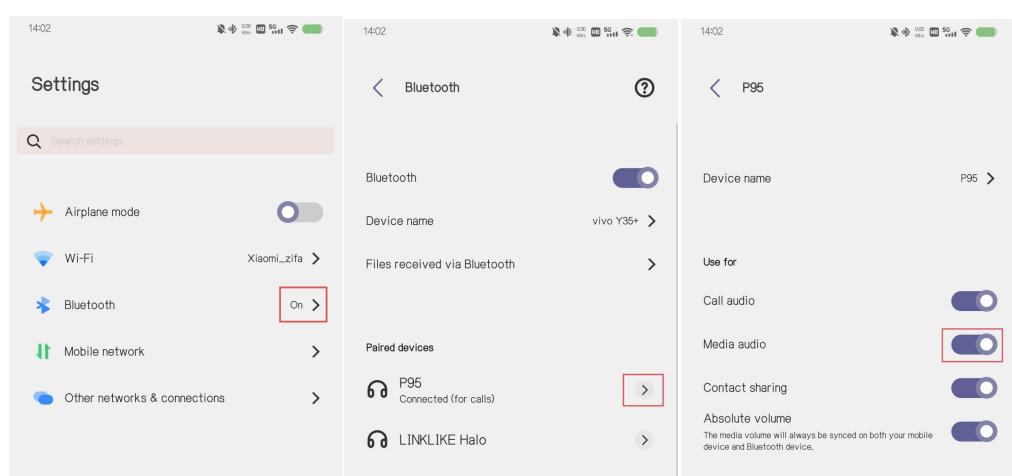

Swipe down from the top right corner of the screen to open the control center.

Click on the audio output icon in the upper right corner and select the media auto you want.

2. For Android user:

Go to your phone [Settings](#), click [Bluetooth - P95](#) - turn on/off [Media audio](#).

3. Switch on the watch:

Swipe down the home screen and go to shortcut menu.

Click phone icon and choose to turn on/off **Media audio**.
